

Industrial Brass Landing Valve with Threaded Connections

This brass landing valve features threaded connections for secure installation in industrial plumbing systems. A handwheel allows for manual control of fluid or gas flow.

Product Overview

Industrial Brass Landing Valve

This industrial-grade landing valve is engineered for robust fluid control in demanding environments. Featuring a durable brass construction and a high-visibility red handwheel, it provides reliable flow regulation for various liquid and gas systems. The inclusion of threaded connections ensures compatibility with standard industrial plumbing setups, making it a versatile choice for facility maintenance and infrastructure projects.

Technical Specifications

Component Type

Landing Valve • Industrial Fitting

Material	Brass
Connection Type	Threaded

Application

Primary Applications

- Liquid flow control
- Gas flow regulation
- Industrial plumbing systems
- Fluid control infrastructure
