

Industrial Butterfly Valve

This industrial butterfly valve is designed to control fluid flow in industrial applications. It features a durable body, a secure mounting design, and a reliable sealing mechanism.

Product Overview

Industrial Butterfly Valve

This industrial butterfly valve is engineered for precise fluid flow control in demanding industrial environments. Featuring a robust blue body and a durable metallic disc, it ensures reliable operation and longevity. The integrated rubber seal provides excellent sealing performance, while the multi-hole flange design allows for secure and versatile mounting.

Technical Specifications

Body Color

Blue

Valve Type

Butterfly Valve

Key Features

Rubber Seal, Metallic Disc, Industrial Grade

Mounting

Multi-bolt flange mount

Handle Type

Manual Lever
