

Industrial Butterfly Valve

This butterfly valve is designed for industrial applications. It provides efficient flow control with a robust and durable construction.

Product Overview

Industrial-Grade Flow Control

This industrial butterfly valve is engineered for robust performance in demanding fluid or gas control applications. Featuring a durable cast metal body, the valve incorporates a sophisticated design with parallel channels and integrated flow indicators. Its heavy-duty construction ensures reliability and precise operation in complex industrial piping systems.

Technical Specifications

Application Suitability

Fluid Control • Gas Regulation • Industrial Piping

Body Material

Cast Metal (Aluminum/Steel)

Design Features

Multi-port configuration, Parallel flow channels, Integrated spherical indicators
