

Industrial Butterfly Valve for Fluid Control

This butterfly valve is a robust industrial component designed for flow control in various piping systems. The valve's design allows for efficient and reliable performance in demanding industrial environments.

Product Overview

Industrial Butterfly Valve

This industrial butterfly valve is a robust component engineered for precise flow control across diverse piping systems. Constructed from durable cast metal, it features a circular body with a central rotating disc designed for efficient fluid regulation. The unit is optimized for demanding industrial environments, offering reliable performance and secure, leak-proof flange mounting.

Design & Construction

Construction Material	Cast Metal
Mounting Type	Flange
Actuation Support	Yes
Key Design Features	Circular Body, Rotating Central Disc, Flange Extension, Leak-proof Seal

Applications

Primary Application	Industrial Fluid Control
