

Industrial Butterfly Valve with Actuator

This high-performance butterfly valve is designed for industrial applications. It features flanged connections for secure installation and an actuator for automated operation, suitable for controlling flow in various fluid systems.

Overview

Industrial Butterfly Valve with Actuator

This high-performance butterfly valve is engineered for demanding industrial fluid control applications. Featuring a robust construction with secure flanged connections, it ensures reliability in challenging environments. The integrated actuator allows for seamless automated operation, providing precise flow control and enabling remote management capabilities essential for modern process systems.

Applications

Suitable Industries

Water Treatment, Chemical Processing, HVAC Systems

Technical Features

Operation Mode

Automated • Remote Control

Valve Type

Butterfly Valve

Connection Type

Flanged

Actuator Included

Yes
