

# Industrial Butterfly Valve with Handwheel Actuator

This high-performance butterfly valve is designed for industrial applications. It features a large circular disc rotating on a central axis and a manual handwheel actuator for precise operation, providing reliable shutoff and throttling capabilities in pipeline systems.

## Product Overview

### Industrial Butterfly Valve

This high-performance butterfly valve is engineered for demanding industrial pipeline applications. Featuring robust construction, it utilizes a large circular disc rotating on a central axis to effectively control fluid flow. Equipped with a manual handwheel actuator, it provides operators with precise control for both shutoff and throttling tasks across a wide range of pressures and fluid types.

## Technical Specifications

### Capabilities

- Reliable shutoff
- Flow throttling
- Wide fluid compatibility
- Pressure regulation

<b>Actuator Type</b>	Manual Handwheel
<b>Key Design Features</b>	High-Performance, Robust Construction, Central Axis Design
