

Industrial Button Sewing Machine for Garments and Shoes

This industrial button sewing machine automates button attachment for garments and shoes. It is ideal for high-volume production, offering adjustable settings and safety features.

Overview

Industrial Efficiency for Textile Production

This industrial button sewing machine is engineered for high-volume manufacturing environments, including garment, shoe, and accessory production. It automates the button attachment process to significantly increase efficiency while maintaining consistent, high-quality stitching. Designed for versatility, the machine adapts to various fabric thicknesses and button types, making it an essential tool for shirts, pants, jackets, and footwear.

Technical Specifications

Model Number	BS-1850E
Suitable Applications	Garments, Shoes, Accessories, Shirts, Pants, Jackets, Bags

Performance & Features

Key Features

- Automated button attachment
- Adjustable stitch length settings
- Adjustable button placement
- Integrated safety mechanisms

Production Environment

High-Volume • Industrial • Multi-Material
