

Industrial Cable Stranding Machine

This heavy-duty machine is designed for producing high-quality cables. The machine features a robust construction with a large rotating mechanism for twisting and layering cable strands.

Product Overview

High-Performance Cable Stranding

This heavy-duty industrial cable stranding machine is engineered for the high-quality production of cables in professional manufacturing environments. It features a robust construction with a large rotating mechanism specifically designed for the precise twisting and layering of cable strands. Equipped with precision controls and integrated safety features, the machine ensures efficient and reliable performance for demanding industrial applications.

Technical Design

Build Quality

Heavy-duty • Robust Construction

Rotating Mechanism

Large-scale mechanism for twisting and layering cable strands

Operation & Control

Control System

Equipped with precision controls for efficient production

Safety Features

Yes

Application

Primary Function

- Cable strand twisting
- Layering of cable strands
- High-quality cable production

Ideal For

Industrial cable manufacturing facilities
