Product Overview

Industrial-Grade Performance

This high-performance industrial burner is engineered for demanding applications, ranging from commercial kitchens to heavy-duty industrial heating processes. Constructed from robust cast iron, the burner features a multi-ring head design that ensures even and efficient heat distribution. With multiple independently controlled stainless steel gas inlets and valves, users can achieve precise flame adjustment for optimal cooking or heating results.

Construction & Design

Material	Cast Iron
Design Features	Spiral Design, Multi-ring Burner Head, Durable Finish

Control & Operation

Control Mechanism

- Individual control valves
- Precise flame adjustment
- Stainless steel gas inlets

Applications

Recommended Applications

Commercial Kitchens • Outdoor Cooking • Industrial Heating
