

Industrial Centrifugal Pump

This centrifugal pump is designed for transferring fluids in industrial environments. It is constructed with durable materials to ensure reliable performance.

Overview

Industrial Fluid Control Solution

This industrial gate valve is engineered for precise fluid flow management in demanding pipeline environments. Featuring a robust flanged connection design and a manual handwheel actuator, it ensures reliable shut-off and throttling capabilities. It is constructed from durable materials, making it an ideal choice for water, oil, and gas infrastructure systems.

Technical Specifications

Operation Method	Manual
Actuator	Handwheel
Connection Type	Flanged

Applications

Industry Suitability

Industrial Pipeline • Fluid Control

Compatible Media	Water, Oil, Gas
