

Industrial Centrifugal Pump

This centrifugal pump is designed for demanding industrial fluid transfer and pressure boosting. Its robust construction includes stainless steel components for corrosion resistance and enhanced durability.

Product Overview

High-Performance Industrial Pump

This industrial centrifugal pump is engineered for demanding fluid transfer and pressure boosting applications. Built with robust stainless steel components, it ensures exceptional corrosion resistance and long-term durability in harsh environments. The system is versatile, offering both single-stage and double-stage configurations to precisely match your specific flow and pressure requirements.

Technical Specifications

Configurations

- Single-stage (WB series)
- Double-stage (WB series)

Key Features

Corrosion Resistant • Durable Construction • High Performance

Material

Stainless Steel

Applications

Common Applications

- Fluid transfer
- Water circulation
- Pressure boosting
