

Industrial Centrifugal Pump

This centrifugal pump is designed for industrial applications. It is suitable for controlling flow in various fluid systems.

Overview

High-Performance Industrial Flow Control

This industrial centrifugal pump is engineered for robust performance in demanding environments. Designed with a durable metal body and disc, it provides reliable flow regulation for critical fluid systems. It is an ideal solution for chemical processing, water treatment, and various industrial applications requiring consistent operational control.

Technical Specifications

Construction Type	Butterfly valve design
Body Material	Metal
Control Mechanism	Manual lever operator

Applications

Suitable Industries	Chemical Processing, Water Treatment, Industrial Fluid Systems
