

Industrial Centrifugal Pump

This centrifugal pump is designed for industrial applications. It ensures efficient fluid transfer with minimal energy consumption.

Product Overview

Industrial Centrifugal Pump

This robust centrifugal pump is engineered for demanding industrial applications, featuring a horizontally split casing design that facilitates easy maintenance and inspection. Directly coupled to a high-efficiency electric motor, it ensures reliable and continuous operation in various fluid transfer environments. The unit is mounted on a sturdy baseplate to provide exceptional stability, minimize vibration, and extend the overall service life of the equipment.

Design & Construction

Casing Design	Horizontally split casing
Coupling	Directly coupled
Mounting	Sturdy baseplate

Performance

Efficiency Features	High-efficiency motor, Low energy consumption, Vibration reduction
---------------------	--

Operational Characteristics

Maintenance

- Easy inspection access
- Simplified maintenance
- Extended service life
