

# Industrial Centrifugal Water Pump

This industrial water pump is engineered for efficient fluid transfer in various applications. Its close-coupled design features a centrifugal pump head directly connected to an electric motor, ensuring robust performance.

## Product Overview

### Industrial Grade Performance

This industrial centrifugal water pump is engineered for demanding agricultural and industrial fluid handling applications. Featuring a robust close-coupled design and a durable TEFC motor, it provides reliable operation in environments exposed to dust and moisture. Constructed from high-quality cast iron and stainless steel, the unit ensures long-term corrosion resistance and performance stability.

## Construction & Design

Build Materials	Cast Iron, Stainless Steel
Motor Enclosure	TEFC (Totally Enclosed Fan Cooled)
Mounting	Sturdy metal base

## Compatibility

### Suitable Fluids

- Clean water
- Slightly contaminated water

Piping Connection	Standard flange
