

Industrial Ceramic Stopper

These monolithic stoppers are designed for industrial applications requiring a secure seal. The stoppers are constructed from white ceramic with a dark gray base, offering durability and heat resistance for various vessel openings.

Product Overview

Industrial Monolithic Stoppers

These industrial ceramic stoppers feature a robust, one-piece monolithic construction designed for high-temperature environments. Their durable white ceramic body and dark gray base ensure a secure, heat-resistant seal for various industrial vessels. Available in multiple sizes and shapes, they are engineered to meet diverse process requirements and withstand demanding operational conditions.

Technical Specifications

Suitability

High-temperature applications • Industrial vessels

Design Features

- Robust one-piece construction
- White ceramic body
- Dark gray base
- Variety of sizes and shapes available

Construction

Monolithic (one-piece)

Material

Ceramic, Heat-resistant
