

Industrial Chemical Storage Tank

This chemical storage tank is designed for industrial applications. It is constructed from high-density polyethylene (HDPE) for chemical resistance and long-lasting performance.

Overview

Industrial Chemical Storage Solution

This durable and robust chemical storage tank is specifically engineered for demanding industrial applications. Constructed from high-density polyethylene (HDPE), it offers superior chemical resistance and long-lasting performance for storing acids and corrosive materials. Its efficient cylindrical design ensures optimal space utilization and straightforward installation in professional environments.

Technical Specifications

Material Composition	High-Density Polyethylene (HDPE)
Design Shape	Cylindrical
Key Features	Chemical Resistant, Secure Lid, Industrial Fittings

Applications

Suitable Applications

- Chemical processing plants
- Water treatment facilities
- Industrial corrosive material storage
