

Industrial Chemical Storage Tanks

These industrial storage tanks are designed for storing chemicals and petrochemicals. The cylindrical tanks feature piping and are suitable for bulk storage and distribution.

Product Overview

Industrial Chemical Storage Solution

These industrial storage tanks are engineered for the bulk containment and management of chemicals and petrochemicals within processing facilities. Designed for durability and safety, the cylindrical metal structure is equipped with integrated piping systems to facilitate efficient distribution. These units are essential components for industrial complexes requiring reliable, large-scale liquid storage solutions.

Technical Specifications

| | |
|-----------------------|--|
| Construction Material | Industrial-grade Metal |
| Tank Geometry | Cylindrical |
| Primary Application | Chemical Storage, Petrochemical, Bulk Distribution |

Compliance & Safety

Safety Features

- Integrated piping system
- Identification markings
- Safety labeling
