

Industrial Chiller Unit with Dual Compressors

This industrial chiller unit is equipped with dual compressor systems, gauges, and control panels. It is mounted on a horizontal cylindrical base and designed for heavy-duty cooling applications.

Overview

Industrial Chiller Unit with Dual Compressors

This industrial chiller unit is engineered for heavy-duty cooling applications, featuring a robust dual compressor system designed for reliability and efficiency. The unit includes an integrated horizontal reservoir base and comprehensive fluid circulation piping for seamless installation. Equipped with a centralized control panel and intuitive display, it offers precise monitoring and management of cooling processes.

System Configuration

Compressor Configuration	Dual Compressor System
Design Features	Heavy-duty, Fluid circulation system, Integrated reservoir base, Centralized control panel

Control & Monitoring

Housing Color	Blue • Beige
Interface	Digital display screen with analog gauges
