

Industrial Cleaning Machine

This industrial cleaning machine is designed for heavy-duty cleaning applications. It features a stainless steel drum, a user-friendly digital control panel, and a robust frame for stability.

Overview

Heavy-Duty Industrial Cleaning Solution

This industrial cleaning machine is engineered for demanding applications, providing reliable performance in commercial laundry and textile processing environments. Built with a robust frame for maximum stability and a durable stainless steel drum, it ensures longevity under heavy usage. The integrated digital control panel offers precise operation, making it a versatile asset for professional cleaning facilities.

Technical Specifications

Model Number	XQG20D
Drum Material	Stainless Steel
Control System	Digital Control Panel

Features

Key Features	Heavy-Duty Design, Robust Frame, Commercial Grade, Digital Interface
