

Industrial Cleaning Machine

This industrial cleaning machine is designed for robust cleaning performance. It efficiently removes dirt, grime, and contaminants in demanding environments.

Overview

Industrial Cleaning Machine

This industrial cleaning machine is engineered for high-performance maintenance tasks in demanding environments. It features precision-engineered components designed to ensure optimal operational efficiency and durability. With advanced sealing technology, it provides reliable performance and is suitable for technical applications requiring strict dimensional accuracy.

Technical Specifications

Key Dimensions

- Diameter (Ø)
- Length B
- Length C
- Length F
- Length S
- Length S1

Seal Type

SL Type Seal

Design Angles

120 degrees

Configuration Details

Precision Engineered, Technical Documentation Ready, High-Performance Seal
