

# Industrial Clear Housing Filter

This industrial filter is designed with a transparent housing for easy visual inspection and timely maintenance. It efficiently removes contaminants, ensuring optimal performance and longevity of equipment in fluid handling applications.

## ADDITIONAL IMAGES

## Overview

### Industrial Clear Housing Filtration

The Clear Captor is a high-efficiency cartridge filter designed for industrial fluid handling systems. Its transparent housing allows for immediate visual inspection of the filter element, enabling proactive maintenance and reducing downtime. Engineered for durability and ease of use, this unit is a reliable solution for maintaining fluid purity in hydraulic and fuel systems.

## Technical Specifications

### Max Working Pressure

**5 BAR**

Max Working Pressure

### Dimensions

Dimension	Value
Base Length	170mm
Height	270mm

Connection Size	BSP 1"
Housing Material	Casting Aluminum

## Features & Capabilities

### Key Features

Ready to use • Replaceable cartridge • High efficiency • Small size

### Compatible Cartridges

- Strainer Cartridge
- Impurities Paper Cartridge
- Water Absorption Paper Cartridge

### Maintenance Components

Transparent housing, Drain valve
