

Industrial CO2/MAG Welding Machine

This industrial welding machine is designed for CO2/MAG welding processes. It features adjustable voltage and current settings, a wire feeder unit, and a robust enclosure.

Product Overview

Professional CO2/MAG Welding Solution

This industrial welding machine is engineered specifically for high-performance CO2/MAG welding processes. Designed for heavy-duty applications, it features a robust enclosure and precise controls for adjustable voltage and current settings. It is an ideal solution for professionals working in the manufacturing, construction, and automotive sectors.

Technical Specifications

Welding Process	CO2, MAG
Model Identifier	FKR350

Key Features

Control Features

- Adjustable voltage settings
- Adjustable current settings
- Integrated wire feeder unit

Application

Suitable Industries

Manufacturing • Construction • Automotive
