

Industrial Communication Modem

This industrial communication modem enables data transmission. Its robust design ensures reliable connectivity for demanding applications.

Product Overview

Industrial-Grade Communication Solution

This industrial-grade communication device is engineered for robust performance in demanding environments. Featuring a heavy-duty construction with a reinforced bolted flange design, it is built to withstand rigorous operational conditions. The unit is mounted on a portable wheeled frame, ensuring ease of positioning and integration within your existing facility infrastructure.

Physical Construction

Mounting Configuration	Wheeled portable frame
Design Features	Bolted Flange, Industrial Grade, Heavy-Duty Construction

Mechanical Components

Actuation System	Integrated hydraulic cylinder
