Product Overview

Industrial Material Handling Solution

This industrial conveyor belt system is engineered for efficient material transportation and handling within production lines or warehouses. Featuring a robust white metal frame and a durable green conveyor belt, the unit offers adjustable height settings to integrate seamlessly into existing workflows. Equipped with mobility wheels, it provides the flexibility required for dynamic industrial environments.

Technical Specifications

Construction Materials

- White Metal Frame
- Industrial-grade Conveyor Belt

Primary Applications

Material Handling • Production Line Integration • Warehouse Logistics

System Type

Chain and Conveyor Belt System

Mobility Features

Wheeled Base, Adjustable Height
