

Industrial Cooling System

This cooling system provides high efficiency and fast cooling capabilities. It is designed for optimal thermal management in industrial applications.

Overview

Industrial Roller Conveyor System

This robust roller conveyor is engineered for the efficient transport of diverse goods, including boxes, bags, trays, and various bulk or irregular materials. Designed for high-performance industrial environments, the system supports heavy single-piece loads and is built to withstand significant impact. It provides a versatile material handling solution, ensuring smooth logistics flow for small items and heavy-duty cargo alike.

Technical Capabilities

Supported Cargo

- Boxes
- Bags
- Trays
- Bulk materials
- Small items
- Irregular shaped items

Load Handling

Heavy Duty, Impact Resistant, Bulk Materials, Irregular Items
