Product Overview

High-Efficiency Milling Solution

This industrial-grade milling system is designed for large-scale corn and wheat processing. It integrates multiple stages including cleaning, degermination, grinding, and sifting to ensure consistent flour quality and optimal yield. Engineered for durability, the system supports continuous operation and is suitable for food and beverage production environments requiring precise control over particle size.

Equipment Type

Industrial Corn Flour Milling Machine

Capabilities

Processing Stages

- Cleaning
- Degermination
- Grinding
- Sifting
- Packaging

Output Products

Corn Flour, Maize Grits, Wheat Flour, Wheat Semolina

Service & Support

Warranty Coverage

1 Year Quality Guarantee • 1 Year Free Spare Parts

Included Services

- Special Design
- Installation
- Commissioning
- Worker Training
- Lifelong Technical Service
