

Industrial Cross Flow Fan 6-inch 47/45W

This industrial cross flow fan is designed for high-volume air movement. It has an impeller diameter of 6 inches and an output power of 47/45W.

Overview

Industrial Cross Flow Fan

This 6-inch industrial cross flow fan is engineered for high-volume, uniform air movement in commercial and industrial settings. It features a robust construction with a protective grille, making it an ideal component for air conditioning units and ventilation systems. The cross-flow design ensures efficient airflow distribution across the entire width of the fan.

Electrical Specifications

Output Power

47 W
At 50Hz
