

Industrial Diesel Engine

This high-performance diesel engine is designed for industrial applications. It features a heavy-duty build, an advanced fuel injection system, and optimized combustion for dependable power and efficiency.

Product Overview

High-Performance Industrial Power

This industrial diesel engine is engineered for demanding operating conditions, offering a robust build and reliable power output. It features an advanced fuel injection system and optimized combustion processes to ensure high efficiency and consistent performance. Designed for longevity, this unit is an ideal power source for a wide range of heavy-duty machinery and industrial equipment.

Technical Specifications

Compatible Components

- Fleetguard Filtration Systems

Key Features

Heavy-Duty Build, Advanced Fuel Injection, Optimized Combustion, Industrial Grade

Filtration Component

Full-flow oil filter (Model: LF3349)
