

Industrial Digital Display Panel Meter

This digital display panel meter is designed for industrial applications. It features a multi-line LED display for simultaneous monitoring of multiple parameters.

Overview

Industrial Digital Display Panel Meter

This industrial digital display meter is engineered for precise monitoring in demanding environments. Designed for panel mounting, it features a multi-line LED display that allows for the simultaneous tracking of multiple process variables. With a focus on high accuracy and long-term stability, this instrument is an essential component for voltage, current, and frequency monitoring applications.

Technical Specifications

Display Type	Multi-line LED
Mounting	Panel-mount
Monitoring Capabilities	Voltage, Current, Frequency, Process Variables

Key Features

Performance Highlights

1 Grade
High Accuracy

100 %
Stability Rating

Application Suitability

Industrial Automation • Power Monitoring • Process Control
