

Industrial Dual Screw Mixing Equipment

This industrial mixing equipment features a conical hopper with dual screw conveyors. It is designed for precise mixing and dispensing of various materials in construction and industrial applications.

Product Overview

Industrial Dual Screw Mixing Equipment

This industrial mixing equipment features a robust conical hopper design integrated with dual screw conveyors to ensure efficient material handling and consistent mixing. Engineered for versatility, the unit is equipped with a top-mounted motor and gearbox assembly, making it suitable for precise mixing and dispensing tasks in both construction and industrial environments. The system is built for durability, incorporating a reinforced support structure and sealed bearings to maintain operational reliability under heavy-duty conditions.

Technical Specifications

Performance Metrics

2 units

Screw Count

Key Design Features

Conical Hopper, Dual Screw Conveyor, Top-Mounted Motor, Sealed Bearings, Adjustable Discharge

Applications

Suitable Industries

- Construction Material Processing
- Industrial Material Handling
- Chemical Mixing
- Powder Dispensing
