

Industrial Dust Collector for Particulate Removal

This industrial dust collector is designed for efficient particulate removal in demanding environments. It features a high-capacity collection bag and a powerful motor, ensuring continuous operation and improved air quality.

Overview

Industrial Efficiency

This industrial dust collector is a robust solution designed for environments requiring efficient particulate removal. Engineered for continuous operation, it features a high-capacity collection system and a powerful motor to maintain optimal suction. Its versatile filtration capabilities make it an ideal choice for maintaining air quality in demanding manufacturing settings like woodworking and metalworking.

Performance

Key Performance Metrics

1100 JFD

Model Capacity

Design & Build

Mobility Features	Sturdy frame, Casters for mobility
Operational Mode	Continuous operation

Applications

Suitable Industries

- Woodworking
- Metalworking
- General Manufacturing

Maintenance

Maintenance Level

Easy maintenance
