

Industrial Electric Motor

This electric motor is designed for industrial applications. It features a durable cast iron frame and an efficient cooling system.

Product Overview

Industrial Three-Phase Asynchronous Gear Motor

This industrial-grade three-phase asynchronous gear motor is engineered for reliable power transmission in demanding operational environments. Featuring a robust cast iron construction and an optimized cooling system, it ensures consistent performance and durability. Designed to meet international standards, this unit provides precise speed control and high torque output suitable for a wide range of industrial applications.

Performance Metrics

Key Performance Indicators

0.37 kW

Power Output

1380 r/min

Rotational Speed

50 Hz

Frequency

Electrical Specifications

Voltage and Current

Parameter	Value
Voltage	230/400 V
Rated Current	1.9/1.1 A
Power Factor (COS)	0.73

Standards and Compliance

Certifications	CE, IEC 60034, 2014/35/EU, 2009/125/EC, 2011/65/EU
----------------	--

Mechanical Specifications

Protection Class

IP 55

Mounting Type

IM B5

Thermal Class

F

Duty Cycle

S1 (Continuous Running)
