

Industrial Electric Motor

This high-efficiency electric motor is designed for industrial applications. It features a robust cast iron frame with cooling fins for optimal heat dissipation, a durable shaft, and a sturdy base for secure mounting.

Product Overview

Industrial-Grade Performance

This high-efficiency electric motor is engineered specifically for demanding industrial applications. It features a robust cast iron frame with integrated cooling fins to ensure optimal heat dissipation during continuous operation. Designed for reliability, the unit includes a durable shaft and a secure terminal box, making it an ideal choice for powering various heavy-duty machinery and equipment.

Construction & Design

Frame Material	Cast Iron
Cooling Mechanism	Integrated cooling fins for heat dissipation
Mounting	Sturdy base for secure installation

Key Features

Design Highlights

- High-efficiency performance
- Durable shaft construction
- Accessible terminal box
- Robust cast iron frame

Suitability	Continuous Operation, Industrial Machinery, Heavy-Duty Equipment
