

Industrial Elevator Motor

This gray industrial elevator motor features a secondary blue motor attached on top. Equipped with lifting eyes and a junction box, the main motor body also has cooling fins and a nameplate.

Overview

Industrial Elevator Motor

This industrial elevator motor is engineered for reliability and consistent performance in demanding vertical transportation environments. Featuring a robust design with integrated cooling fins and a secondary motor unit, it ensures optimal thermal management during operation. The unit is equipped with standard lifting eyes for secure installation and maintenance, making it a dependable choice for modern elevator systems.

Design & Construction

Design Features	Cooling Fins, Secondary Motor Unit, Lifting Eyes, Junction Box
Finish	Gray main body with blue secondary motor

Technical Specifications

Component Identification

Main Motor • Auxiliary Motor • Nameplate Attached
