

# Industrial Enclosure Fan Filter Unit

This panel fan filter unit is designed for ventilation and cooling in industrial enclosures. It features a louvered grill and filter element to prevent ingress of dust and capture airborne particles.

## Overview

### Industrial Cooling Solution

This panel fan filter unit is expertly designed for reliable ventilation and cooling within industrial enclosures. It features a louvered grill on the external side to effectively prevent the ingress of dust and debris, while the internal filter element captures airborne particles. Engineered for durability, it ensures long-lasting performance in demanding environments, protecting sensitive electronic components in control panels and electrical cabinets.

## Technical Specifications

### Design Features

- Louvered external grill
- Internal filtration media
- Durable construction
- Optimized for airflow

### Protection Type

Dust Protection • Debris Prevention • Airborne Particle Filtration

### Primary Application

Control Panels, Electrical Cabinets, Industrial Equipment
