

Industrial Equipment Status Indicator

This indicator provides a visual signal for equipment status in industrial applications. Its compact design allows for easy integration into control panels or machinery.

Overview

Industrial Status Indicator

This industrial status indicator is engineered to provide clear, reliable visual feedback for equipment status and fault conditions. Featuring a compact, durable design, it integrates seamlessly into control panels and machinery to enhance operational safety. With high-visibility illumination, it ensures critical information is communicated effectively in demanding industrial environments.

Technical Specifications

Voltage Rating	230 V
Frequency	50/60Hz
Power Consumption	3 W

Certifications & Compliance

Certifications	CE, UL
