

Industrial Ethernet Switch for Automation

This Ethernet switch is designed for industrial automation and control systems. It features multiple ports for connecting devices like PLCs, HMIs, and sensors, facilitating data exchange and centralized management of manufacturing processes.

Overview

Industrial-Grade Connectivity

The ET2000-M is a robust industrial Ethernet switch designed specifically for demanding automation and control environments. It facilitates seamless communication between PLCs, HMIs, sensors, and other critical network-enabled equipment, ensuring reliable data exchange. Built for durability, this switch is an essential component for centralized monitoring and management in manufacturing processes.

Technical Specifications

Compatible Devices

- PLCs
- HMIs
- Industrial Sensors
- Network-enabled Equipment

Build Quality

Robust Design • Reliable Performance

Model Number	ET2000-M
Application	Industrial Automation, Manufacturing Control, Data Exchange
