

Industrial Evaporative Air Cooler

This industrial evaporative air cooler is designed for energy-efficient cooling in large spaces. It features adjustable louvers for directional airflow and a water level indicator.

Overview

Industrial Cooling Solution

This industrial evaporative air cooler is engineered for high-efficiency cooling in large-scale commercial and industrial environments. It features a robust design that ensures durability, while the integrated cooling pad and adjustable louvers provide precise, directional airflow. Designed with energy efficiency in mind, it offers a practical and cost-effective cooling solution for demanding workspaces.

Key Features

Core Features

- High-efficiency cooling pad
- Adjustable louvers for directional airflow
- Water level indicator
- Easy-to-use control interface
- Caster wheels for enhanced portability

Design Benefits

Energy Efficient, Durable Construction, Portable, Industrial Grade

Application

Suitable Environments

Commercial • Industrial • Large Spaces
