

Industrial Evaporative Air Cooler

This evaporative air cooler delivers high-performance cooling for industrial and commercial applications. It features variable speed control and a durable design suitable for demanding environments.

ADDITIONAL IMAGES

Product Overview

High-performance air cooler featuring a durable one-piece molded housing and clear LED control panel.

Industrial Evaporative Air Cooler

This industrial-grade evaporative air cooler is designed for high-performance cooling in demanding environments such as factories, warehouses, and workshops. It utilizes an advanced evaporative process to lower ambient temperatures efficiently without the use of harmful refrigerants. Built with a durable, one-piece molded housing, this unit is engineered for long-term reliability and minimal maintenance.

Performance Metrics

Airflow Capacity

7000 m³/h
Max Airflow

90 m²
Coverage Area

Energy Consumption

0.6 KWh/h

Technical Specifications

| | |
|---------------|---|
| Voltage Range | 110V - 230V |
| Speed Control | 10% - 100% Variable Speed |
| Control Modes | Speed Controlled, Temperature Controlled, Time Controlled |

Key Features

Design Features

- One-piece molded polyethylene housing
- High-performance variable speed motor
- Thicker cooling pad for improved heat absorption
- Heavy-duty casters for portability
- Micro-computer programmed control with LED panel

Recommended Applications

Injection Molding • Printing • Food Processing • Warehousing • Commercial Outdoor
