

Industrial Exhaust Fan

This high-performance electrical fan is designed for efficient air circulation and ventilation. It features a durable construction with a multi-blade impeller for optimal airflow and is suitable for residential and commercial applications.

Overview

High-Performance Ventilation Solution

This industrial exhaust fan is engineered to deliver efficient air circulation and reliable ventilation for demanding environments. Featuring a durable construction and a precision-balanced multi-blade impeller, it ensures optimal airflow performance. Its robust circular frame design includes integrated mounting points, facilitating straightforward installation in both commercial and residential settings.

Performance Metrics

Primary Function

Exhaust • Cooling • Air Circulation

Design & Construction

Frame Design	Circular frame with mounting points
Impeller System	Multi-blade design

Application

Suitable Applications	Industrial, Commercial, Residential
