

Industrial Fan Heater 1.5-1.8kW

This industrial fan heater features adjustable thermostat control and robust metal construction. It operates on a 120V power supply, providing 1.5kW to 1.8kW of power for space heating.

Product Overview

Industrial-Grade Heating Solution

This square-type industrial fan heater is engineered for demanding environments such as workshops, garages, and construction sites. Featuring a robust metal construction and a safety-focused design, it delivers reliable warmth with an adjustable thermostat for precise temperature management. Its portable, stable design ensures versatility and safety for professional heating applications.

Technical Specifications

Power Range

1.5 kW

Minimum Power

1.8 kW

Maximum Power

Current Draw

- 3A (Low)
- 5A (High)

Voltage

120V

Frequency

60Hz

Compliance and Safety

Certifications
