

Industrial Fan Heater

Industrial fan heater designed for space heating. Features a robust square design with a protective front grill.

Product Overview

Industrial Heating Performance

The IFH02-150 is a high-capacity industrial fan heater engineered for efficient space heating in commercial and industrial environments. Its robust square-type design incorporates a protective front grill to ensure operational safety while maintaining airflow. Featuring an adjustable thermostat and multiple power settings, this unit provides reliable climate control for demanding professional workspaces.
