

Industrial Fire Hose - Type III

This industrial fire hose is a Type III model. It is constructed from durable materials, designed to withstand high pressure and extreme temperatures.

Product Overview

Industrial Fire Hose - Type III

This Type III industrial fire hose is engineered for demanding environments, including petroleum and mining water transmission, chemical construction sites, and marine applications. It features a robust construction designed for high-pressure water delivery, offering superior resistance to abrasion, oils, acids, alkalis, and corrosion. Lightweight and maintenance-free, this hose is built for longevity and reliability in critical firefighting and fluid transport operations.

Applications & Usage

Primary Applications

Petroleum, Mining, Chemical Construction, Fire Engines, Fire Brigades, Marine/Ships

Key Features

Material Characteristics

- Strong wear resistance
- Aging resistance
- Oil resistance
- Acid and alkali resistance
- Corrosion resistance
- Cold resistance
- Lightweight construction
- Maintenance-free
