

Industrial Flow Meter for Liquids and Gases

This meter is designed for measuring flow rates of liquids and gases in industrial settings. It features a robust construction suitable for demanding environments, providing accurate readings and data output for monitoring and control systems.

Product Overview

Industrial Flow Meter for Liquids and Gases

This industrial flow meter is engineered for high-precision measurement of both liquid and gaseous media. Designed for demanding industrial environments, its robust construction ensures reliability and longevity in challenging operational conditions. It integrates advanced sensing technology to provide accurate real-time data, making it an essential component for monitoring and control systems in various industrial applications.

Technical Specifications

Design Features

- Robust construction for demanding environments
- Advanced sensing technology
- Data output for monitoring systems
- Suitable for precise industrial flow measurement

Compatible Media

Liquids, Gases
