

Industrial Frequency Converter with Wired/Wireless Remote

This frequency converter is designed for robust industrial applications. It provides reliable frequency conversion and is available with either a wired or wireless remote controller.

Product Overview

Industrial Frequency Solution

This industrial frequency converter is engineered for high-demand environments such as tunneling projects and sites with restricted space. It features versatile remote operation capabilities, allowing for both wired and wireless control to enhance workplace safety and efficiency. Designed with robust three-phase power technology, these units ensure reliable performance in demanding construction and industrial applications.

Technical Specifications

Available Models

- ZJB150/165/4+2
- ZJB150/165/6
- ZJB200/85/6

Power Configuration	Three-phase
---------------------	-------------

Standard Outlet Sockets	6
-------------------------	---

Operational Features

Control Options	Wired Remote, Wireless Remote
-----------------	-------------------------------

Customization	Yes
