Product Overview

Industrial-Grade Processing

This industrial fruit and vegetable crusher is engineered for high-efficiency processing in restaurants, large-scale enterprise canteens, and food factories. It effectively grinds fresh produce like garlic, ginger, chili, and assorted fruits into precise mashed or particle forms. Designed with a robust stainless steel construction, it ensures long-lasting durability and adheres to strict hygiene standards for food processing environments.

Technical Specifications

Primary Material

Stainless Steel • Food-Grade Silicon

Blade Design

X-form stainless steel heated blades for high-speed, dead-angle-free processing

Sealing Material

Non-toxic, pollution-free silicon

Operational Features

Processed Materials

- Garlic
- Ginger
- Fresh Chili
- Vegetables
- Fruits

Ideal Applications

Restaurants, Canteens, Food Factories, Industrial Processing

Safety and Maintenance

Safety Mechanisms

- Safety interlock system
- Fully enclosed crushing chamber
- Non-toxic sealing components

Maintenance

Easy-tilt barrel design allows for convenient water-based cleaning
