Product Overview

Industrial Cleaning Solution

This industrial bubble washing machine is designed for the high-volume processing of fresh fruits and vegetables. Utilizing a combination of high-pressure water and powerful aeration, the system effectively tumbles and cleans produce while isolating silt and debris. Built entirely from durable stainless steel, it offers a robust solution for food processing facilities looking to maintain high hygiene standards.

Performance Metrics

Operational Performance

3000 kg/h
Max Capacity

10 m/h
Feeding Speed

Technical Specifications

Power Consumption

Component	Power
Reducer	0.75 KW
Oxygen Pump	2.2 KW
Diving Pump	0.37 KW

Dimensions (L×W×H)

3800×1030×1100 mm

Construction Material

Stainless Steel, Corrosion Resistant

Compatibility

Processed Items

- Apples
- Strawberries
- Cherries
- Dates
- Cabbage
- Mushrooms
- Lettuce
- Marinated vegetables
- Medicinal materials
