

Industrial Garment Dry Cleaning Machine

The industrial dry cleaning machine is designed for efficient and thorough garment cleaning. It features a robust construction, advanced control panel, and a cylindrical drum for optimal cleaning performance.

Overview

Industrial Cleaning Performance

The QGX10TFP industrial dry cleaning machine is engineered for high-volume, professional-grade garment care. Built with a robust construction and a specialized cylindrical drum, it ensures thorough and efficient cleaning for commercial laundry applications. Its advanced control interface and integrated monitoring ports allow operators to maintain precise oversight throughout every cleaning cycle.

Technical Specifications

Key Functional Features

- Cylindrical cleaning drum
- Advanced electronic control panel
- Integrated process viewing ports

Model Identifier	QGX10TFP
Build Quality	Industrial Grade, Heavy Duty

Application

Recommended Use

Commercial Laundry • Dry Cleaning Services
