Product Overview

Industrial Resilient Wedge Gate Valve

This robust resilient wedge gate valve is engineered for reliable fluid control in demanding industrial and water distribution systems. Featuring a non-rising stem design and a durable fusion-bonded epoxy coating, it ensures long-term performance and corrosion resistance. It is compatible with both flanged and grooved piping configurations, offering versatility for various installation requirements.

Technical Specifications

Pressure Rating

250 PSI

Rated Pressure

17.2 Bar

Working Pressure

Max Operating Temperature

71 °C

Coating Specifications

Electrostatically applied fusion-bonded epoxy (0.2-0.5mm) inside and outside

Design & Construction

Connection Options

- Flanged x Groove
- Groove x Groove

Key Features

Non-Rising Stem, Resilient Wedge, Bolted Bonnet

Compliance & Standards

Standards Compliance

AWWA C509 • AWWA C550

Maintenance

Cold Weather Handling

Valves should be kept in an open position after testing to allow for complete drainage.
