

Industrial Gate Valve - DN 50-400, Standard, Flanged Connection

Industrial gate valve designed according to standards, featuring a flanged connection. It is constructed from durable materials suitable for controlling the flow of various fluids.

Product Overview

Industrial Gate Valve

This industrial gate valve is engineered to comply with Russian GOST standards, ensuring consistent quality and performance for demanding pipeline applications. Featuring a robust flanged connection, the design facilitates secure and reliable integration into existing industrial infrastructure. It is specifically designed to effectively control the flow of various fluids, making it a versatile choice for professional industrial fluid management.

Technical Specifications

Standard	Russian Standard
Nominal Diameter Range	DN 50, DN 400
Connection Type	Flanged
Valve Category	Gate Valve
